SUMMARY

I am an Informatics Engineering graduate from Adventist University of Indonesia with a GPA of 3.56/4.00 (Cumlaude) , specializing in full-stack web development and backend systems. I developed the noncommercial Komunitas Reptil Bandung (KRB) website, a comprehensive platform featuring a public website, an admin content management system (CMS), reptile catalog, educational resources, articles, galleries, event registration, membership management, and a contest judging system with QR/PIN authentication, blind judging, weighted scoring, live results, and versioned score corrections.The project was built using Next.js 16, React 19, TypeScript, Payload CMS 3, PostgreSQL 16, Tailwind CSS 4, and Cloudflare R2. It incorporates role-based access control (RBAC), multi-factor authentication (MFA), maker-checker review workflows, append-only audit logs, data validation, privacy controls aligned with Indonesia's Personal Data Protection Law (UU PDP), scheduled jobs, and automated daily backups. The implementation was tested through 137 integration tests and 63 end-to-end (E2E) tests.I am proactive, detail-oriented, and adaptable, with a strong commitment to problem-solving, continuous learning, and building reliable, secure, and maintainable applications. I am eager to contribute to full-stack development, backend engineering, and cross-functional technical project

EDUCATION

Bachelor of Informatics Engineering — GPA 3.56/4.00 (Cumlaude) *Aug 2022 – Jun 2026*

Adventist University of Indonesia, Bandung, Indonesia

- Thesis: Web-Based Expert System for Disease Diagnosis and Maintenance Optimization of Ornamental Plants in Parongpong.
- Relevant coursework: Database Systems, Web Development, Systems Analysis, HTML, and JavaScript.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Bootstrap, PHP
- Front-End: React.js, React Native, Inertia.js
- Back-End: Node.js, Laravel, Express
- Database: Prisma ORM, MySQL, SQLite, Supabase, PostgreSQL
- Tools: Git, GitHub, REST APIs
- Languages: Indonesian (Native), English (Beginner)

WORK EXPERIENCE

IT Support & Web Developer Intern *May 2025 – Aug 2025*

Konfederasi Serikat Buruh Seluruh Indonesia

- Developed and maintained organizational website components using HTML and CSS, including news sections, organizational profiles, membership information, and WhatsApp contact integration to improve accessibility and communication.
- Assisted in developing and improving internal office web systems to support administrative workflows, information management, and day-to-day organizational operations.
- Provided IT support through hardware and software installation, maintenance, and troubleshooting, while assisting with internal network configuration and connectivity to ensure reliable office operations.

PROJECT EXPERIENCE

IoT-Based Fish Pond Monitoring and Control System — Final Year Thesis *Jan 2026 – April 2026*

- Developed an IoT-based fish pond monitoring and control system using Arduino Uno and ESP32-CAM to monitor water temperature, water level, and water clarity in real time.
- Integrated sensors, automated water temperature and water quality control, and scheduled fish feeding to improve pond maintenance efficiency and reduce manual intervention.
- Implemented Telegram Bot integration for remote monitoring, instant notifications, automated feeding commands, and camera-based visual monitoring of pond conditions.

Full Stack Developer — Bandung Reptile Community Website — Non-Commercial

- Built a fully responsive Netflix-inspired streaming platform clone with React 19 and Vite on the frontend, backed by Express.js and MySQL.
- Structured the codebase with Atomic Design (atoms, molecules, organisms, pages), improving component reusability and long-term maintainability.
- Implemented JWT-based authentication with bcrypt.js password hashing and custom middleware to secure private routes and API endpoints.
- Reduced redundant API calls by fetching movie data via Axios and performing in-memory filtering for category views (Trending, Top Rated, Continue Watching, New Releases).
- Built an interactive Watchlist ("Daftar Saya") feature with real-time add/remove functionality, keeping state synchronized across pages via React state management.
- Designed a dark-themed, mobile-first UI from scratch with Tailwind CSS v4, ensuring visual consistency across mobile, tablet, and desktop.

ORGANIZATION EXPERIENCE

Head of Logistics, Unceasing Cantica - Choir *Sep 2022 – Apr 2023*

Adventist University of Indonesia, Bandung, Indonesia

- Led a 1-member logistics team across 10+ organizational events, ensuring 100% equipment readiness and on-time execution throughout the term.
- Managed end-to-end logistical coordination for all BEM programs, overseeing procurement, distribution, and setup with zero event disruptions.

Public Relations — Disaster Response Task Force (Satgas Siaga Bencana) *Sep 2025 – Apr 2026*

Adventist University of Indonesia, Bandung, Indonesia

- Supported public relations activities by coordinating information dissemination, documenting organizational activities, and communicating updates related to disaster preparedness and humanitarian initiatives.
- Assisted in public communication and coordination during disaster response activities, helping ensure accurate information sharing and effective collaboration among team members and relevant stakeholders.

CERTIFICATIONS & COURSES

Certifications

- Alibaba Cloud Certified Associate: Cloud Engineer — Alibaba Cloud (Des 2025)
- Git & GitHub Fundamentals — Dicoding Indonesia (Feb 2025)
- Basics of Structured Query Language (SQL) Fundamentals — Dicoding Indonesia (Feb 2025)
- Introduction to Programming Fundamentals for Software Developers — Dicoding Indonesia (Feb 2025)

SOFT SKILLS

- Problem Solving, Time Management, Attention to Detail, Analytical Thinking, Teamwork
